

LOUIS Bentzky

Ing. informatician

Professional Summary

Full-Stack Developer with about 3 years of professional experience in Python/Django, Linux administration, and modern web development. Proven ability to design, deploy, and maintain scalable web applications. Founder of the BitTonik project, a feature-rich digital platform for contests, e-library, and e-commerce. Possesses expertise in database management, and secure VPS deployment and administration. Passionate about digital transformation and leveraging technology for social and educational impact. Experienced technical instructor, currently teaching an online class to help beginners get started with Python programming. Currently enhancing the e-commerce module for BitTonik while available for project-based, contract, part-time, or full-time roles in development, DevOps, or technical training.

CORE SKILLS

- Web Application Development (Backend & Frontend)
- UX/UI Design Fundamentals
- Database Design & Management
- Linux Server Administration (VPS)
- Application Deployment & Hosting
- Continuous Integration & Version Control
- Technical Documentation & Communication

PERSONAL ATTRIBUTES

- Responsible and dependable
- Solution-oriented problem solver
- Strong technical curiosity and self-learner
- Detail-oriented and autonomous
- Analytical and proactive

LANGUAGES

- Haitian Creole: Native
- French: Professionnal
- English: Intermediate

PROFESSIONAL EXPERIENCES

Founder & Lead Developer

BitTonik (Contest Platform, Digital Library & E-Store)

2024 – Present

- Architected, developed, and deployed a full-featured platform integrating contests, digital library management, and e-commerce modules.
- Implemented advanced backend modules for point conversion, VIP access, ratings, reviews, and secure transactions.
- Applied **Agile and incremental development methodologies**, managed feature iterations, and coordinated technical releases.
- Maintained version control and collaborative development via **Git/GitHub**, ensuring code quality and maintainability.

Backend Developer & Django Integrator

Personal Projects - 2023 – Present

- Developed custom applications for real-world use cases, including a fully functional (using mailcow) known as BitTonik Mail.
- Designed and implemented a University Management System, covering student records, courses, and administrative workflows.
- Optimized backend performance, refactored business logic, and ensured security best practices.

VPS Administrator & Linux Deployment

BitTonik / Blessed Wing Technology (BWT) - 2024 – Present

- Deployed and administered **Linux-based VPS servers** for production environments with security, performance, and reliability considerations.
- Managed databases, system services, and application deployment pipelines for web and e-commerce platforms.
- Ensured high availability and continuous operation systems.

Instructor & Technical Trainer

Online Python Programming Courses - 2026

- Designing and delivering Python programming courses and mentoring students in best coding practices.

Office Computing Instructor – Universe School | 2024 – 2025

- Taught Microsoft Office fundamentals, guiding students in practical exercises to develop professional computing skills.

Volunteer Trainer & Mentor

Community Workshops | 2023 – Present

- Conducted sessions on **Internet basics, graphic design, and web design**, providing mentorship and practical support to individuals in need.

EDUCATION & ACADEMIC TRAINING

BACHELOR'S DEGREE IN COMPUTER SCIENCE

- *Université Jérusalem de Pignon, Haïti (UJEPH) | 2026*
 - Specialization: **Software Engineering, Networking & Linux, and Database Management**
 - Final Project: **Digital Solutions for Education**

SECONDARY EDUCATION

- *Lycée National de Mirebalais, Haïti*
 - Diploma: Experimental Sciences Section

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Office Computing – SUCCESS INFO
- Graphic Design & Visual Communication – SUCCESS INFO / UJEPH
- Communication, Protocol & Social Etiquette – ISFH
- Leadership & Project Management – EDPM / EXAMPLAIN
- Professional English – BOSS (Best Opportunity Standard School)

TECHNICAL SKILLS

- Programming & Frameworks: Python (Django), React, NestJS, React Native, JavaScript
- Web & System Administration: Linux (Ubuntu), Nginx, Apache, SSH, UFW, SSL/TLS, VPS deployment, Docker
- Databases: MySQL, MongoDB, PostgreSQL
- Tools & Platforms: Git/GitHub, VS Code, Mailcow, SOGo, Tailwind CSS...
- Office & Design: Microsoft Office Suite, Canva, PS, AI

SELF-DIRECTED TRAINING & PROJECTS

- Designed, developed, and deployed the BitTonik platform, integrating contest management, e-commerce modules, and a digital library on Ubuntu VPS, following security and scalability best practices.
- Strengthened expertise in backend optimization, system deployment, Git/GitHub workflows, Agile and incremental development, with ongoing exploration of cross-platform technologies.

PROJECTS & LIVE DEMOS

- **BitTonik Platform** – <https://bittonik.com>
Contest management platform with digital library and e-store modules.
- **University Management System** – <https://sg.bittonik.com>
Academic management system for UJEPH.
- **Blessed Wing Technology (BWT)** – <https://bwt.bittonik.com>
Official company website and digital services showcase.
- **Professional Mail Solution (BitTonik Mail)** – <https://mail.bittonik.com>
Fully deployed professional email system (Mailcow-based).
